

2014 IDDE – Dry Weather Screening

September, October 2014 (NPDES Permit 4.2.3.)

I. Outfall screening/ river screening

(West Fork Stones: Old Fort Pkwy to Thompson Ln)

Miles Screened	Outfalls Screened	Illicit
4.75	31	0

II. Hot spot screening (Map attached)

Staff screened junction boxes and open channels within hot spot areas.

Hot spot area	Flows	Illicit
Commercial A.	0	0
Industrial A.	1	0
Industrial B.	1	0

* 1 water leak observed, 1 equipment washing activity observed

III. Miscellaneous observations

- Multiple camps within riparian zone with trash accumulated around them.
- Outfall at Old Fort Parkway in need of trash rack.
- Water levels in the West Fork Stones were lowered due to utility work. Because low water levels, staff located a spring and noted normally submerged substrate.
